ABOUT ME

I am a driven economics student with a keen interest in bridging the gap between economic principles and practical applications through technology. Having successfully completed my AAT exams and now embarking on my ICAN journey, I possess a robust understanding of financial operations. My hands-on experience as a frontend developer, evidenced by several completed web development projects, showcases my technical proficiency and problem-solving abilities. Currently, I serve as a Data Analyst at Centrepoint Supermarket, where I'm responsible for inventory management and data-driven insights. I also have experience in UI/UX design, having conducted product research, built prototypes, and created high-fidelity designs. I worked on the Centrepoint Supermarket app and am currently developing a fintech application focused on seamless money transfers and requests. I am enthusiastic about combining my analytical mindset, programming skills, and accounting knowledge to contribute effectively to dynamic environments.

WORK EXPERIENCE

Centrepoint

Entry level | Data Analysis
Ibadan , Nigeria
2025-02-01 | Currently working here

As a Data Analyst at Centrepoint Supermarket, my core responsibility was to leverage extensive datasets for strategic decision-making and to significantly optimize overall business performance. This involved a comprehensive approach, encompassing the full lifecycle of data management, in-depth analysis, and clear reporting. I played a pivotal role in identifying key trends and actionable insights, directly contributing to substantial improvements across various critical areas, including sales growth, efficient inventory management, and a deeper understanding of customer behavior and preferences. I also collaborated with various departments to translate complex data into practical business strategies.

Deji

Entry level | Frontend developer
Ibadan , Nigeria

My primary responsibility was to create a comprehensive website that would effectively inform investors about market developments. I leveraged my technical expertise to transform this concept into a highly intuitive and user-friendly platform. The successful delivery of this project provided a much-needed solution, ensuring investors remained well-informed and engaged with the critical happenings in the market.

EDUCATION

Adeleke University

HND | B.sc. Economics

Final year B.Sc. Economics student with a strong foundation in microeconomics, macroeconomics, econometrics, and public finance. Proficient in data analysis and statistical software like specific software like Python, SPSS. Possess strong analytical, problem-solving, and research skills. Eager to apply economic principles to real-world challenges and contribute to economic analysis, policy formulation, market research.
